1. Team roles

Product Owner	Fuhao Shi
Scrum Master	Xiaxiang Zhou

2. Customer meeting

   We had a meeting on 10.26, 1:30pm, at the 2nd floor of Rudder Tower.

   We will meet on Sunday, 1:30pm later on.

3. Summary of customer need and how the app meets it.

   The expected features include: 1. establish several database, including Student information per family; courses provided; administrator profile and Teacher profile. 2. Registration page that each family owns an account, and can choose which of their children when registering a particular class. 3. Contact page that parent/future parent can send message to the right person they want to contact. 4. Volunteer sign up page that one can log in and sign up for the volunteering time slot. 5. Administrator/Teacher Query. Administrator/Teacher can login and query student information, such as parent contact, emergency contact. 6. User can choose to show as English or Chinese for the website.

   We will first build the Model-View-Controller framework on 1, 2, and 5. They are basically the same requirement, but with different databases. We will then fulfill 3 and finally 6. The stakeholder is Emily Su for all the needs.

4. User stories

   Please check the attached pdf file.

5. Lo-fi UI

   Please check attached pdf files.
